DETAILED ACTION

1 Claims 1-62 are pending.

2. Applicant's election without traverse of Group I, claims 1-12, 30, 45, 46 and 53-62 in the reply filed on 06/26/06 is acknowledged.

3. Claims 13-29, 31-44 and 47-52 are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b) as being drawn to nonelected inventions.

4. Upon further consideration and review, an additional election of species is required as set forth below.

Species Election

5. Applicant is further required under 35 USC 121 (1) to elect a single disclosed species to which the claims would be restricted if no generic claim is finally held to be allowable and (2) to list all claims readable thereon including those subsequently added.

Applicant is required to elect a specific method for increasing or maintaining the number of functional cells, wherein a specific TNF-alpha agonist or a TNF-alpha inducing substance is selected from the group recited in claim 5 and wherein one specific disease is recited in one of the claims 59-62.

These species are distinct because a specific method for increasing or maintaining the number of functional cells, wherein a specific TNF-alpha agonist or a TNF-alpha inducing substance is selected from the group recited in claim 5 and wherein one specific disease is recited in one of the claims 59-62 differ with respect to the specific TNF-alpha agonist or a TNF-alpha inducing substance and in etiologies and therapeutic endpoints of pathological conditions; thus each specific method employing a specific TNF-alpha agonist or a TNF-alpha inducing substance and each condition represents patentably distinct subject matter. The examination of species would require different searches in the scientific literature.

Art Unit: 1644

6. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michail Belyavskiy whose telephone number is 571/ 272-0840. The examiner can normally be reached Monday through Friday from 9:00 AM to 5:30 PM. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on 571/ 272-0841.
